

WEDDING RING[®]

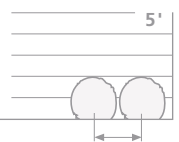

B. m. var. koreana 'Eseles', pp#22,328, cbr#4595

Stable variegation.

There are other variegated boxwood but no others with the hardiness and gloss of Wedding Ring. This evergreen has rich, glossy green foliage with a lime margin that matures to gold as summer progresses. It holds its color well in summer and winter. This is an excellent addition to formal landscapes, or can be used as a distinctive accent plant.

DEER-RESISTANT | MAY BE TRIMMED IN SUMMER

- **SIZE & SHAPE**
