

SIMPLY SCENTSATIONAL™

Calycanthus floridus 'SMNCAF'

USPPAF, CBRAF

Common name: sweetshrub, Carolina allspice

Landscape Info:

| | |
|----------------|------------------|
| USDA zones: | USDA 4-9 |
| Mature height: | 6'/1.8m |
| Exposure: | Part-full sun |
| Irrigation: | Average to moist |

Features & Benefits:

- Exceptionally fragrant native sweetshrub – selected from dozens of seedlings and evaluated for years for fragrance.
- Blooms early-mid summer
- Deer resistant

| 1 gallon | 4" • QT | 12-14 • 10-12 |
| 2 -3 gallon | 4" • QT | 18-22 • 16-18 |

Grower Tips:

- This is a large plant that will send out long shoots if not pruned to develop a dense body.
- Spring trimming/shearing will remove most old-wood flower buds, but new growth will produce blooms if allowed to grow out.
- May also be sheared through the season, though bud production drops in mid-summer.
- Large leaves may impede irrigation – water carefully.
- Potting a 2 ¼" liner directly to a 3 gallon is not recommended.

NOTES:
