

# HAYWIRE™

*Chamaecyparis lawsoniana*

'SMNCLUTL' USPPAF, CBRAF

Common name: Lawson's false cypress

Landscape Info:	
USDA zones:	5b - 7
Mature height:	12-18'/3.6-5.4m
Exposure:	Part – full sun
Irrigation:	Average

Features & Benefits:
<ul style="list-style-type: none"> <li>- Foliage is a unique twisted thread-leaf type for major textural impact</li> <li>- Grows as a wide pyramid</li> <li>- Tougher and more vigorous than most <i>C. lawsoniana</i> selections</li> </ul>

Cultural info:		
pH Level:	5.6 – 6.2	
Nutrient Needs:	Average	
EC (2:1 extract):	0.6 – 0.9	
Light Level:	Moderate to high	
Watering:	Moderate	
Rooting Out Temp:	65 – 72° F/18.3 – 22.2° C	
Overwintering Temp:	Polyhouse, no heat (where hardy)	
Sales Window:	Evergreen, can be sold all season	
Blooms On:	Conifer; does not bloom	
Trimming/pruning:	Trim 1-2 times	
Vernalization:	Required	
Vigor Rating:	Average	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	16-20 • 15-19 • 14-18
2 - 3 gallon	1 gal shift	12-14 (see notes)

Grower Tips:
<ul style="list-style-type: none"> <li>• Naturally grows as a narrow column with many short branchlets emerging from a main stem. Little pruning, aside from imposing a leader if necessary, is required.</li> <li>• If pruning is required, do not cut into heavy wood – trim soft growth only.</li> <li>• Avoid strong winter sun – clear poly in winter is not recommended.</li> <li>• Good drainage is imperative for a successful crop. A fungicide drench is recommended after potting and again in spring as a preventative against root rot diseases.</li> <li>• For 3 gallon plants, do not pot any size liner directly to the can; rather, use a one gallon shift. Add 12-14 weeks on top of time required to produce a one gallon.</li> </ul>
NOTES:
