

HAPPY JACK® Purple

Clematis 'Zojapur'
pp#20,343
Common name: clematis

Landscape Info:	
USDA/AHS zones:	USDA 5/AHS 9
Mature height:	6-8'/1.8-2.4 m
Exposure:	Part sun-full sun
Irrigation:	Average

Features & Benefits:
<ul style="list-style-type: none"> - All Proven Winners clematis are easy to grow, disease resistant, and require no fussy pruning. - Improved 'Jackmanii' with larger flowers, better color, and longer bloom time. - Prune to 18"/.45 m in spring each year. - Can be trained on a trellis, pergola, railing, or post.

Cultural info:		
pH Level:	5.6 – 6.2	
Nutrient Needs:	Low (see notes)	
EC (2:1 extract):	0.6 – 0.9	
Light Level:	High	
Watering:	Moderate; good drainage imperative.	
Rooting Out Temp:	65 – 72° F/18.3 – 22.2° C	
Overwintering Temp:	Polyhouse, no heat (where hardy)	
Sales Window:	Blooms late spring-summer; sell any time	
Blooms On:	Old and new wood	
Trimming/pruning:	Prune 2-3 times through season	
Vernalization:	Required	
Vigor Rating:	Average	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	10-12 • 9-11 • 8-10
2 -3 gallon	4" • QT	16-20 • 14-18

Grower Tips:
<ul style="list-style-type: none"> • One of the easiest varieties to ship in bud and bloom. • Grow plants cool early in the season to prevent top growth from outpacing root development, which complicates maintenance later. Lower fertility also prevents this. • Should be grown in larger, rather than smaller, pots, with a bamboo trellis or similar structure placed in the soil. Use a light, fast-draining growing media. • Pinch/prune 2-3 times to encourage branching and minimize plants growing into each other. • Plants benefit from manual training of vines onto support structure, which results in less maintenance and a more appealing plant at retail. • Once flower buds have set, grow plants drier to prevent clematis wilt. Spray with thiophanate-methyl fungicide as a preventative. • Top-dress with rice hulls or something similar to minimize weeds, algae, liverwort, etc., since leaf coverage of soil is minimal. • Should be last plants to be moved outdoors. • Potting a 2 ¼" liner directly to a 3 gallon is not recommended.
