

RED ROVER®

Cornus obliqua 'Powell Gardens' pp#27,873

Cornus obliqua

Brilliant fall foliage makes this native plant a valuable addition to landscapes. Blue fruit adds to its autumn appeal. Clean green spring and summer foliage contrasts nicely with the white flowers in late spring. This is an outstanding plant for moist to damp soils, and is a valuable resource for our pollinator populations and birds.

- NATIVE
- COMPACT
- RAIN GARDENS
- BIOSWALES
- PRUNE TO SHAPE AFTER FLOWERING

- SIZE & SHAPE
4 - 5' TALL
AND WIDE
