Watering:	Average	
Rooting Out Temp:	65 – 72° F/18.3 – 22.2° C	
Overwintering Temp:	Polyhouse – no heat (where hardy)	
Sales Window:	All season; blooms early summer, reblooms	
Blooms On:	New wood	
Trimming/pruning:	Pinch or shear 2-4 times	
Vernalization:	Required	
Vigor Rating:	Moderate to fast	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	8-10 • 7-9 • 6-8 (see notes)
2 - 3 gallon	4" • QT	16-20 • 14-18

Grower Tips:
<ul style="list-style-type: none"> • <i>Hydrangea arborescens</i> grows quickly so is best grown in 2 gallon containers or larger. However, 1 gallon plants can be produced quickly for same-season sales; any that do not sell can then be shifted to three or five gallon cans and turned in an additional 10-14 weeks. • Potting a 2 ¼" directly to a 3 gallon is not recommended. • Trim 2-4 times during growing season. When dormant, cut back by a few inches to ensure a compact flush for sale. • Flower color is not affected by soil pH. • Applying B-Nine and Cycocell darkens foliage and encourages a dense, appealing habit for sale; proper timing is crucial for success, so consult our info sheet for details. • Incrediball® Blush reblooms and can be cycle-pruned to ship in-bloom product all season. Allow 8-10 weeks to rebloom after trimming (shorter in warm conditions, longer in cool).
NOTES:
