Grower Tips:
<ul style="list-style-type: none"> <li>• Trim 3-4 times to build plant body.</li> <li>• Benefits from a dormant prune of a few inches off the top early in the spring prior to sale. If a subsequent trim must be done at the nursery before shipping, it should occur in late spring at the latest to allow flower buds to develop.</li> <li>• Panicle hydrangeas prefer to fill the container with roots before they put on top growth.</li> <li>• Somewhat susceptible to spider mites, scout often and treat aggressively. Avoid stress to minimize threat.</li> <li>• For late season sales, avoid drought stress to preserve good flower color.</li> </ul>
