Grower Tips:
<ul style="list-style-type: none"> • Easy to ship in bloom for spring sales. • Blooms on old wood – dormant or spring pruning will remove flower buds. • Long, arching stems benefit from frequent pruning to keep plant dense and balanced. • Trim as often as new growth allows during season of potting; stop pruning in late July to allow flower buds to form before season of sale. • Watch for spider mites and treat according to your IPM protocol.
