Grower Tips:	
•	Should not be allowed to freeze if producing in cold climates.
•	Dormant or spring pruning will remove flower buds.
•	This variety does rebloom, so can be shipped in bloom through summer. Allow 8-10 weeks after a trim for flower buds to form.
•	Trim frequently to produce a full container, but do not cut into thick, heavy stems. Plant can be a bit slow to branch out, so cut only into soft, herbaceous growth.
•	Keep plants on the dry side during dormancy.
•	Spider mites can be problematic; scout and treat according to your IPM protocol.
•	Dwarf variety finishes as quickly as other loropetalum but will be a smaller plant.
NOTES:
