

PEPPY LE POM™

Punica granatum 'SMNPGMF' ppaf

The perfect summer patio plant!

Pomegranate is a beautiful plant with a long, storied history - and this dwarf selection opens it up to a whole new audience. Peppy Le Pom™ ornamental pomegranate is a dwarf shrub that blooms early and all summer long, peppered with jaw-droppingly bright orange blooms. They give way to small ornamental fruits - the few seeds inside are edible, but not the primary reason we selected this plant. Its petite frame makes it ideal for use as a container plant, and in cold climates, it can be brought indoors for winter and grown as a houseplant. Warm climates can enjoy it as a dwarf shrub with a wide range of applications in the landscape.

• SIZE & SHAPE

3 - 4' TALL
3' WIDE
