

Physocarpus opulifolius

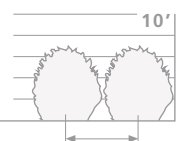

COPPERTINA[®]

Physocarpus opulifolius 'Mindia', pp#16,371, cbr#2892

2011 Cut Flower of the Year, Association of Specialty Cut Flower Growers

This distinctive take on our native ninebark has beautiful coppery foliage in spring, and transforms to a rich red in summer. It's a durable choice for exposed sites, and is a colorful option for hedges and mass plantings. This drought-tolerant, adaptable plant will also grow in rain gardens.

• **SIZE & SHAPE**
