Physocarpus opulifolius

**Good powdery mildew resistance**

The compact, arching habit of this ninebark makes it an excellent fit for most landscapes. The dark crimson-red leaves have good disease-resistance and add season-long color to landscapes. Excellent as a mass planting, a hedge, or incorporated into mixed borders.

**SUMMER WINE®**

Physocarpus opulifolius ‘Seward’, pp#14,821, cbr#2641

- **SPACING 6-8’**
- **USDA ZONE 3-7**
