

INTERSTELLA®

Pieris japonica 'FARROWPJRF' ppaf; cbraf

A galaxy of springtime blooms.

Whether you call it Japanese andromeda or lily of the valley shrub, Interstella pieris will have you seeing stars when it bursts into bloom with thousands of lantern-like ruby-colored blooms in early spring. The long-lasting display is followed by the emergence of dramatic red new growth, and handsome evergreen foliage secures year-round presence and beauty. Thrives in the same conditions as rhododendrons.

- **SIZE & SHAPE**
