Grower Tips:
<ul style="list-style-type: none"> <li>• Can be grown much like <i>Spiraea japonica</i>; trim often to form a dense, rounded plant.</li> <li>• Avoid cutting into thick stems – prune to shape only.</li> <li>• First bloom of the season will occur on old wood, so avoid dormant or spring pruning if in-bloom early season shipping is desired.</li> <li>• The plant blooms prolifically on new wood as well. Trimming is not required for continuous bloom to occur, though it will neaten appearance and retail appeal. Allow roughly 8 weeks after a trim for new buds and flowers.</li> <li>• Spider mites can become an issue. Keep cool by providing good air circulation and shade if necessary; avoid water stress.</li> </ul>
