Grower Tips:
<ul style="list-style-type: none"> • All roses benefit from frequent light trimming, which produces an attractive habit and encourages abundant bloom. • Will come out of winter fine in an unheated polyhouse; however, overwintering above freezing will help you ship in-bloom product earlier. • May be cycle-pruned for a continuous supply of in-bloom product to ship; Allow 6-8 weeks after a trim for flower buds to form. Keep well-watered and fertilized. • All Proven Winners roses are disease resistant in the landscape, but normal rose disease prevention methods – avoid overhead watering, clean up debris, etc. – are strongly recommended for the best crop. • Watch for aphids and spider mites.
