Grower Tips:

- All roses benefit from frequent light trimming, which produces an attractive habit and encourages abundant bloom.
- Will come out of winter fine in an unheated polyhouse; however, overwintering above freezing will help you ship in-bloom product earlier.
- May be cycle-pruned for a continuous supply of in-bloom product to ship; Allow 6-8 weeks after a trim for flower buds to form. Keep well-watered and fertilized.
- All Proven Winners roses are disease resistant in the landscape, but normal rose disease prevention methods – avoid overhead watering, clean up debris, etc. – are strongly recommended for the best crop.
- Watch for aphids and spider mites.
