

Spiraea japonica

DOUBLE PLAY[®] CANDY CORN[®]

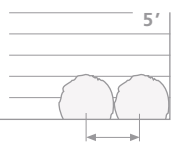

Spiraea japonica 'NCSXI', pp#28,313, cbraf

Crazy colorful spirea!

Candy apple red foliage starts the show in spring, then the foliage transforms to pineapple yellow as the season progresses. If that's not enough, dark purple-red flowers appear in late spring! This low mounded plants adds easy color to landscapes, and is a great choice for mass plantings.

- **SIZE & SHAPE**
1.5 - 2.5' TALL
AND WIDE

- **SPACING** 2.5 - 3'
- **USDA 4, AHS 9**
- **FULL SUN/PART SHADE**

DEER-RESISTANT | COMPACT

PRUNING IS SELDOM NEEDED, BUT MAY BE TRIMMED AFTER FLOWERING
