

PROUD BERRY®

Symphoricarpos 'Sofie'

pp#21,226

Common name: coralberry

Landscape Info:	
USDA/AHS zones:	USDA 3/AHS 7
Mature height:	3-4'/.9-1.2 m
Exposure:	Part shade-sun
Irrigation:	Average

Features & Benefits:
<ul style="list-style-type: none"> - A durable and underused plant. In late summer, bell-shaped white flowers appear and are quickly followed by large pink berries, which persist through late autumn. - Not edible - Deer-resistant, drought-tolerant, shade-tolerant: a real landscape problem solver.

Cultural info:		
pH Level:	5.6 – 6.2	
Nutrient Needs:	Average	
EC (2:1 extract):	0.6 – 0.9	
Light Level:	Moderate-high	
Watering:	Moderate	
Rooting Out Temp:	65 – 72° F/18.3 – 22.2° C	
Overwintering Temp:	Polyhouse, no heat (where hardy)	
Sales Window:	All season; fruit and flowers in late summer	
Blooms On:	New wood	
Trimming/pruning:	Trim 3-4 times	
Vernalization:	Required	
Vigor Rating:	Average to fast	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	10-12 • 9-11 • 8-10
2 - 3 gallon	2 ¼" • 4" • QT	14-16 • 12-14 • 10-12

Grower Tips:
<ul style="list-style-type: none"> • Fast to produce – can potentially be turned the same year and sold in flower/fruit late in the season as part of fall color programs. • Trim up to 4 times, as new growth allows, to encourage branching and a dense plant. Stop pruning by late June to allow flower buds to form for sale in late August if desired. • Frequent light pruning results in the best looking plants. • If overwintered, a dormant prune is beneficial. • Susceptible to spider mites; scout often and treat according to your IPM program.
NOTES:
