

BABY KIM™

Syringa 'SMNSDTP'

ppaf, cbrf

Common name: Korean lilac

Landscape Info:

USDA zones:	3-8
Mature height:	1.5-2.5'/.4-.7 m
Exposure:	Full sun
Irrigation:	Average

Features & Benefits:

- Improved form of 'Miss Kim', with a compact habit, darker foliage, and bright, non-fading flowers.
- Good disease resistance on foliage and roots.
- Light rebloom can occur if spent flowers are trimmed off in the late spring.

Cultural info:

pH Level:	5.6 – 6.2	
Nutrient Needs:	Average	
EC (2:1 extract):	0.6 – 0.9	
Light Level:	Moderate-high	
Watering:	Moderate	
Rooting Out Temp:	65 – 72° F/18.3 – 22.2° C	
Overwintering Temp:	Polyhouse, no heat (where hardy)	
Sales Window:	All season; spring bloom	
Blooms On:	Old wood	
Trimming/pruning:	Trim 2-3 times	
Vernalization:	Required	
Vigor Rating:	Average	
Finish Size	Liner Size	Weeks of Active Growth to Finish
1 gallon	2 ¼" • 4" • QT	14-16 • 13-15 • 12-14
2 - 3 gallon	4" • QT	18-22 • 16-20

Grower Tips:

- Watch soil moisture after transplanting as this dwarf selection is a little slower than most other syringa to root out.
- Vegetative growth is primarily limited to spring and early summer; heavy prunes are not recommended on this variety.
- Best produced and sold as a 2 or 3 gallon – this plant needs a good root system in place before it will bloom well.
- Spring or dormant pruning will remove flower buds. No trimming or pruning should be done past mid-July to allow flower buds to form for the next season.

NOTES:
