Grower Tips:	
<ul style="list-style-type: none"> • Quick to finish in containers, provide light 1-2 trims to build a good body. • Grow in media with a balanced pH and good drainage, taxus do not like wet feet. • As taxus do not like wet feet, potting any sized liner directly to a 3 gallon is not recommended. Rather, use a 1 gallon shift, adding 14-18 weeks to the time required to produce the 1 gallon. • This female plant will produce berries, though most will be hidden within the foliage.
