

NORTH POLE[®]

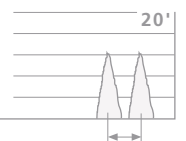

Thuja occidentalis 'Art Boe' pp#22,174, cbr#3912

Narrow, columnar evergreen

The exceptionally narrow habit of this new arborvitae makes it very useful as either a dramatic specimen or a narrow screen. A great choice for smaller sites. Selected by Art Boe of Faribault, MN, it has excellent winter color and is resistant to winter burn.

- **SIZE & SHAPE**
10-15' TALL
3-5' WIDE

- **SPACING** 5-7'
