Grower Tips:
<ul style="list-style-type: none"> <li>• Neatly variegated foliage gives this weigela all-season appeal.</li> <li>• Spring and dormant pruning will remove flower buds.</li> <li>• Trim to shape as new growth allows to produce a dense, compact plant. Stop trimming in late July to allow flower buds to form for sale the following season.</li> <li>• In northern climates this plant performs well in full sun, in southern climates full sun may cause leaf burn.</li> <li>• Spider mites may become an issue; scout and treat as your IPM program dictates.</li> </ul>
